

IMDG - UN card

UN 1374

UN number 1374		Shipping name FISH MEAL, UNSTABILIZED / FISH SCRAP, UNSTABILIZED FISKEMEL, IKKE STABILISERET				
Class 4.2	Packing group III	Hazard labels 4.2	Marine pollutant Maybe	EmS F-A, S-J	<i>ADR transport category: 2</i> <i>ADR tunnel: (D/E)</i>	
Hazard labels 		Marking UN 1374 FISH MEAL, UNSTABILIZED / FISH SCRAP, UNSTABILIZED				
Packaging		Can be packed in approved packaging according to packing instruction P410. Note: Packagings shall be hermetically sealed (PP31).				
Mixed packaging		The substance may be packaged with other substances in the same outer packaging if: - it is permitted to load the substances together, and - the substances do not react dangerously with one another.				
Remarks		The packages, including bales, are exempt from labelling provided that they are marked with the appropriate class (e.g. "class 4.2") (SP 29). Fish meal, fish scrap and krill meal shall not be transported if the temperature at the time of loading exceeds 35°C or 5°C above the ambient temperature, whichever is higher (SP 300). The consignment shall be accompanied by a certificate from a recognized authority stating: moisture content; fat content; details of anti-oxidant treatment for meals older than 6 months (for UN 2216 only); -anti-oxidant concentration at the time of shipment, see special provision 308 (for UN 2216 only); packing, number of bags and total mass of the consignment; temperature of fish meal at the time of despatch from the factory; date of production. No weathering/curing is required prior to loading. Fish meal under UN 1374 shall have been weathered for not less than 28 days before shipment. When fish meal is packed into containers, the containers shall be packed in such a way that the free air space has been restricted to the minimum (SP 907). The provisions of the IMDG Code shall not apply to: fish meal when acidified and wetted with more than 40% water, by mass, irrespective of other factors; consignments of fish meal which are accompanied by a certificate issued by a recognized competent authority of the country of shipment or other recognized authority stating that the product has no self-heating properties when transported in packaged form; or fish meal manufactured from "white" fish with a moisture content of not more than 12% and a fat content of not more than 5% by mass (SP 928).				
Properties and observations		See entry above.				
Tank type:	T1	Transport in bulk			Orange panel	
Tank provisions:	TP33	Not allowed			1374	
Stowage and segregation						
Stowage	Must be protected from sources of heat (SW1). For special stowage provisions, see 7.4.1.3 and 7.6.2.7.2 of the IMDG Code (SW24).					
Segregation	Check the segregation table for sea transport. There are no special requirements for segregation.					
Placarding of the transport unit	Containers, semi-trailers and tank containers must be marked with enlarged hazard labels (placards) on all four sides. Railway wagons must at least be marked with placards on both sides. All other transport units, e.g. trucks etc., must at least be placarded on both sides and at the back. The placards must have a size of at least 250 x 250 mm, and be of such quality that the labeling is still visible after 3 months at sea.					
Foodstuff	The substance is not required to be kept separate from food and feed.					
Limited quantities (LQ)				Excepted quantities (EQ)		
<i>Combination packaging</i>				<i>Combination packaging</i>		
Inner: Not allowed				Inner: 30 mg el. mL		
Outer:				Outer: 1000 mg el. mL		
<i>Trays</i>				Must be packed in an intermediate packaging with cushioning material. Max 1000 parcels per vehicle/container.		
Inner: Not allowed						
Outer:
