

IMDG - UN card

UN 1482

UN number 1482	Shipping name PERMANGANATES, INORGANIC, N.O.S. PERMANGANATER, UORGANISKE, N.O.S.				
Class 5.1	Packing group III	Hazard labels 5.1	Marine pollutant Maybe	EmS F-H, S-Q	<i>ADR transport category: 3</i> <i>ADR tunnel: (E)</i>
Hazard labels 		Marking UN 1482 PERMANGANATES, INORGANIC, N.O.S. (Note: The proper shipping name must be supplemented with the substance's technical description in brackets)			
Packaging	Can be packed in approved packaging according to packing instruction P002.				
Mixed packaging	The substance may be packaged with other substances in the same outer packaging if: - it is permitted to load the substances together, and - the substances do not react dangerously with one another.				
Remarks	If the chemical or physical properties of a substance covered by this description are such that, when tested, it does not meet the established defining criteria for the class or division listed in column 3, or any other class or division, it is not subject to the provisions of the IMDG Code except in the case of a marine pollutant where 2.10.3 applies (SP 223). Ammonium permanganate and its aqueous solutions and mixtures of a permanganate with an ammonium salt are not to be accepted for transport (SP 353).				
Properties and observations	Solids. React vigorously with sulphuric acid. React fiercely with cyanides when heated or by friction. May form explosive mixtures with combustible material, powdered metals or ammonium compounds. These mixtures are sensitive to friction and are liable to ignite. When involved in a fire, may cause an explosion. Transport of ammonium permanganate and mixtures of a permanganate with an ammonium salt is prohibited.				
Tank type:	T1	Transport in bulk		Orange panel	
Tank provisions:	TP33	Not allowed		1482	
Stowage and segregation					
Stowage	There are no special requirements for stowage.				
Segregation	Check the segregation table for sea transport. The substance belongs to group: permanganates (SGG14). Stow "separated from" SGG2 – ammonium compounds (SG38). Stow "separated from" SGG6 – cyanides (SG49). Stow "separated from" SGG16 – peroxides (SG60). Note that for this substance, the consignor must assign the substance to a segregation group based on the substance's physical and chemical properties, if applicable. "Seperated from": May not be loaded into the same transport unit.				
Placarding of the transport unit	Containers, semi-trailers and tank containers must be marked with enlarged hazard labels (placards) on all four sides. Railway wagons must at least be marked with placards on both sides. All other transport units, e.g. trucks etc., must at least be placarded on both sides and at the back. The placards must have a size of at least 250 x 250 mm, and be of such quality that the labeling is still visible after 3 months at sea.				
Foodstuff	The substance is not required to be kept separate from food and feed.				
Limited quantities (LQ) <i>Combination packaging</i> Inner: 5 kg Outer: 30 kg <i>Trays</i> Inner: 5 kg Outer: 20 kg		Excepted quantities (EQ) <i>Combination packaging</i> Inner: 30 mg Outer: 1000 mg Must be packed in an intermediate packaging with cushioning material. Max 1000 parcels per vehicle/container.
