

IMDG - UN card

UN 2556

UN number 2556		Shipping name 🇬🇧 NITROCELLULOSE WITH ALCOHOL 🇩🇰 NITROCELLULOSE MED ALKOHOL				
Class 4.1	Packing group II	Hazard labels 4.1	Marine pollutant Maybe	EmS F-B, S-J	<i>ADR transport category: 2</i> <i>ADR tunnel: (B)</i>	
Hazard labels 		Marking UN 2556 NITROCELLULOSE WITH ALCOHOL				
Packaging		Can be packed in approved packaging according to packing instruction P406. Note: Packagings shall be hermetically sealed (PP31).				
Mixed packaging		The substance may be packaged with other substances in the same outer packaging if: - it is permitted to load the substances together, and - the substances do not react dangerously with one another.				
Remarks		This substance may be transported under the provisions of class 4.1 only if it is so packaged that the percentage of diluent will not fall below that stated, at any time during transport (see 2.4.2.4) (SP 28). The nitrocellulose shall meet the criteria of the Bergmann-Junk test or methyl violet paper test in the Manual of Tests and Criteria Appendix 10 (SP 394).				
Properties and observations		Nitrocellulose may be granular or in flakes, blocks or fibrous form. In case of leakage, flammable vapours are evolved which, in closed compartments, may form explosive mixtures with air. When involved in a fire, evolves toxic fumes; in closed compartments, these fumes may form an explosive mixture with air. Highly explosive when dry. May form extremely sensitive compounds with heavy metals or their salts.				
Tank type:		Transport in bulk			Orange panel	
Not allowed						
Tank provisions:		Not allowed				
–						
Stowage and segregation						
Stowage		Must be protected from sources of heat (SW1). Keep as cool as reasonably practicable (H2).				
Segregation		Check the segregation table for sea transport. Stow “away from” class 3 (SG7). Stow “away from” SGG7 – heavy metals and their salts (SG30). “Away from”: May not be loaded into the same transport unit without the permission of the authorities.				
Placarding of the transport unit		Containers, semi-trailers and tank containers must be marked with enlarged hazard labels (placards) on all four sides. Railway wagons must at least be marked with placards on both sides. All other transport units, e.g. trucks etc., must at least be placarded on both sides and at the back. The placards must have a size of at least 250 x 250 mm, and be of such quality that the labeling is still visible after 3 months at sea.				
Foodstuff		The substance is not required to be kept separate from food and feed.				
Limited quantities (LQ)				Excepted quantities (EQ)
