

IMDG - UN card

UN 3213

UN number 3213		Shipping name BROMATES, INORGANIC, AQUEOUS SOLUTION, N.O.S. BROMATER, UORGANISKE, VANDIG OPLØSNING, N.O.S.				
Class 5.1	Packing group II	Hazard labels 5.1	Marine pollutant Maybe	EmS F-H, S-Q	ADR transport category: 2 ADR tunnel: (E)	
Hazard labels 		Marking UN 3213 BROMATES, INORGANIC, AQUEOUS SOLUTION, N.O.S. (Note: The proper shipping name must be supplemented with the substance's technical description in brackets)				
Packaging Can be packed in approved packaging according to packing instruction P504.						
Mixed packaging The substance may be packaged with other substances in the same outer packaging if: - it is permitted to load the substances together, and - the substances do not react dangerously with one another.						
Remarks Ammonium bromate and its aqueous solutions and mixtures of a bromate with an ammonium salt are not to be accepted for transport (SP 350).						
Properties and observations When involved in a fire, may cause an explosion. Leakage and subsequent evaporation of the water of the solutions may present increased dangers as follows: .1 in contact with combustible material (particularly with fibrous material such as jute, cotton or sisal) or sulphur, danger of spontaneous combustion; .2 in contact with ammonium compounds, powdered metals or oils, danger of explosion. Transport of ammonium bromate, aqueous solution is prohibited.						
Tank type: T4		Transport in bulk		Orange panel		
Tank provisions: TP1		Not allowed		3213		
Stowage and segregation						
Stowage		There are no special requirements for stowage.				
Segregation		Check the segregation table for sea transport. The substance belongs to group: bromates (SGG3). Stow "separated from" SGG2 – ammonium compounds (SG38). Stow "separated from" SGG6 – cyanides (SG49). Stow "separated from" sulphur (SG62). Note that for this substance, the consignor must assign the substance to a segregation group based on the substance's physical and chemical properties, if applicable. "Seperated from": May not be loaded into the same transport unit.				
Placarding of the transport unit		Containers, semi-trailers and tank containers must be marked with enlarged hazard labels (placards) on all four sides. Railway wagons must at least be marked with placards on both sides. All other transport units, e.g. trucks etc., must at least be placarded on both sides and at the back. The placards must have a size of at least 250 x 250 mm, and be of such quality that the labeling is still visible after 3 months at sea.				
Foodstuff		The substance is not required to be kept separate from food and feed.				
Limited quantities (LQ) Combination packaging Inner: 1 L Outer: 30 kg Trays Inner: 1 L Outer: 20 kg		Parcel label: 		Excepted quantities (EQ) Combination packaging Inner: 30 mL Outer: 500 mL Must be packed in an intermediate packaging with cushioning material. Max 1000 parcels per vehicle/container.
