

IMDG - UN card

UN 3218

UN number 3218		Shipping name NITRATES, INORGANIC, AQUEOUS SOLUTION, N.O.S. NITRATER, UORGANISKE, VANDIG OPLØSNING, N.O.S.				
Class 5.1	Packing group II	Hazard labels 5.1	Marine pollutant Maybe	EmS F-A, S-Q	<i>ADR transport category: 2</i> <i>ADR tunnel: (E)</i>	
Hazard labels 		Marking UN 3218 NITRATES, INORGANIC, AQUEOUS SOLUTION, N.O.S.				
Packaging		Can be packed in approved packaging according to packing instruction P504.				
Mixed packaging		The substance may be packaged with other substances in the same outer packaging if: - it is permitted to load the substances together, and - the substances do not react dangerously with one another.				
Remarks		Aqueous solutions of class 5.1 inorganic solid nitrate substances are considered as not meeting the criteria of class 5.1 if the concentration of the substances in solution at the minimum temperature encountered in transport is not greater than 80% of the saturation limit (SP 270).				
Properties and observations		When involved in a fire, may cause an explosion. Leakage and subsequent evaporation of the water of the solutions may present increased dangers as follows: .1 in contact with combustible material (particularly with fibrous material such as jute, cotton or sisal) or sulphur, danger of spontaneous combustion; .2 in contact with ammonium compounds, powdered metals or oils, danger of explosion.				
Tank type:	T4	Transport in bulk		Orange panel		
Tank provisions:	TP1	Not allowed		3218		
Stowage and segregation						
Stowage		There are no special requirements for stowage.				
Segregation		Check the segregation table for sea transport. Stow "separated from" SGG2 – ammonium compounds (SG38). Stow "separated from" SGG6 – cyanides (SG49). Stow "separated from" sulphur (SG62). Note that for this substance, the consignor must assign the substance to a segregation group based on the substance's physical and chemical properties, if applicable. "Seperated from": May not be loaded into the same transport unit.				
Placarding of the transport unit		Containers, semi-trailers and tank containers must be marked with enlarged hazard labels (placards) on all four sides. Railway wagons must at least be marked with placards on both sides. All other transport units, e.g. trucks etc., must at least be placarded on both sides and at the back. The placards must have a size of at least 250 x 250 mm, and be of such quality that the labeling is still visible after 3 months at sea.				
Foodstuff		The substance is not required to be kept separate from food and feed.				
Limited quantities (LQ) <i>Combination packaging</i> Inner: 1 L Outer: 30 kg <i>Trays</i> Inner: 1 L Outer: 20 kg		Parcel label: 		Excepted quantities (EQ) <i>Combination packaging</i> Inner: 30 mL Outer: 500 mL Must be packed in an intermediate packaging with cushioning material. Max 1000 parcels per vehicle/container.
