

IMDG - UN card

UN 1327

UN number 1327	Shipping name HAY, STRAW / BHUSA HØ / HALM / BHUSA					
Class 4.1	Packing group —	Hazard labels 4.1	Marine pollutant Maybe	EmS F-A, S-I	ADR transport category: ADR tunnel:	
Hazard labels 		Marking UN 1327 HAY, STRAW / BHUSA				
Packaging	Can be packed in suitable packaging according to packing instruction P003. Note: Carriage as bales is authorized (PP19).					
Mixed packaging	The substance may be packaged with other substances in the same outer packaging if: - it is permitted to load the substances together, and - the substances do not react dangerously with one another.					
Remarks	The packages, including bales, are exempt from labelling provided that they are marked with the appropriate class (e.g. "class 4.2") (SP 29). Transport of hay, straw or bhusa when wet, damp or contaminated with oil is prohibited and when not wet or contaminated with oil is subject to the provisions of the IMDG Code (SP 281). The provisions of the IMDG Code shall not apply to consignments of compressed baled hay with a moisture content of less than 14% shipped in closed cargo transport units and accompanied by a certificate from the shipper stating that the product does not present any class 4.1, UN 1327, hazard in transport and that its moisture content is less than 14% (SP 954). Packages, with the exception of bales, shall also display the proper shipping name and the UN number of the substance that they contain in accordance with 5.2.1. In any case, the packages, including bales, are exempt from class marking provided that they are loaded in a cargo transport unit and that they contain goods to which only one UN number has been assigned. The cargo transport units in which the packages, including bales, are loaded shall display any relevant labels, placards and marks in accordance with chapter 5.3 (SP 973).					
Properties and observations	Ignites readily. Liable to spontaneous combustion when wet, damp or contaminated with oil. Refuse for shipment when loose, damp, wet or contaminated with oil.					
Tank type:	Not allowed	Transport in bulk		Orange panel		
Tank provisions:	—	Not allowed		1327		
Stowage and segregation						
Stowage	Unless carried in closed cargo transport units, bales shall be properly covered by tarpaulins or the like. Cargo spaces shall be clean, dry and free from oil or grease. Ventilator cowls leading into the cargo space shall have sparking-preventing screens.					
Segregation	Check the segregation table for sea transport. Stow "away from" animal or vegetable oils (SG23). "Away from": May not be loaded into the same transport unit without the permission of the authorities.					
Placarding of the transport unit	Containers, semi-trailers and tank containers must be marked with enlarged hazard labels (placards) on all four sides. Railway wagons must at least be marked with placards on both sides. All other transport units, e.g. trucks etc., must at least be placarded on both sides and at the back. The placards must have a size of at least 250 x 250 mm, and be of such quality that the labeling is still visible after 3 months at sea.					
Foodstuff	The substance is not required to be kept separate from food and feed.
