

IMDG - UN card

UN 1386

UN number 1386		Shipping name SEED CAKE OLIEKAGER				
Class 4.2	Packing group III	Hazard labels 4.2	Marine pollutant Maybe	EmS F-A, S-J	ADR transport category: 3 ADR tunnel: (E)	
Hazard labels 		Marking UN 1386 SEED CAKE				
Packaging		Can be packed in suitable packaging according to packing instruction P003. Note: Any sift-proof, tearproof receptacle may be used (PP20). Can also be packaged in large packagings (LP02).				
Mixed packaging		The substance may be packaged with other substances in the same outer packaging if: - it is permitted to load the substances together, and - the substances do not react dangerously with one another.				
Remarks		The packages, including bales, are exempt from labelling provided that they are marked with the appropriate class (e.g. "class 4.2") (SP 29). If satisfied, as a result of tests, that such relaxation is justified, the competent authority may permit: the seed cakes described as "SEED CAKE, containing vegetable oil (a) mechanically expelled seeds, containing more than 10% of oil or more than 20% of oil and moisture combined" to be transported under conditions governing "SEED CAKE, containing vegetable oil (b) solvent extractions and expelled seeds, containing not more than 10% of oil and, when the amount of moisture is higher than 10% not more than 20% of oil and moisture combined", and the seed cakes described as "SEED CAKE, containing vegetable oil (b) solvent extractions and expelled seeds, containing not more than 10% of oil and, when the amount of moisture is higher than 10% not more than 20% of oil and moisture combined" to be transported under conditions governing SEED CAKE, UN 2217. Certificates from the shipper shall state oil content and moisture content and shall accompany the shipment (SP 929). Packages, with the exception of bales, shall also display the proper shipping name and the UN number of the substance that they contain in accordance with 5.2.1. In any case, the packages, including bales, are exempt from class marking provided that they are loaded in a cargo transport unit and that they contain goods to which only one UN number has been assigned. The cargo transport units in which the packages, including bales, are loaded shall display any relevant labels, placards and marks in accordance with chapter 5.3 (SP 973).				
Properties and observations		Residue remaining after oil has been expelled mechanically from oil-bearing seeds. Used mainly as animal feed or fertilizer. The most common seed cakes include those derived from coconut (copra), cottonseed, groundnut (peanut), linseed, maize (hominy chop), niger seed, palm kernel, rape seed, rice bran, soya bean and sunflower seed and they may be shipped in the form of cake, flakes, pellets, meal, etc. May self-heat slowly and, if wet or containing an				
Tank type:	Not allowed	Transport in bulk		Orange panel		
Tank provisions:	–	Not allowed		1386		
Stowage and segregation						
Stowage		Must be protected from sources of heat (SW1). For special stowage provisions, see 7.6.2.7.3 of the IMDG Code (SW25). Keep as dry as reasonably practicable (H1).				
Segregation		Check the segregation table for sea transport. There are no special requirements for segregation.				
Placarding of the transport unit		Containers, semi-trailers and tank containers must be marked with enlarged hazard labels (placards) on all four sides. Railway wagons must at least be marked with placards on both sides. All other transport units, e.g. trucks etc., must at least be placarded on both sides and at the back. The placards must have a size of at least 250 x 250 mm, and be of such quality that the labeling is still visible after 3 months at sea.				
Foodstuff		The substance is not required to be kept separate from food and feed.
