

IMDG - UN card

UN 1471

UN number 1471		Shipping name LITHIUM HYPOCHLORITE, DRY / LITHIUM HYPOCHLORITE MIXTURE LITHIUMHYPOCHLORIT, TØRT / LITHIUMHYPOCHLORIT, BLANDING				
Class 5.1	Packing group III	Hazard labels 5.1	Marine pollutant Maybe	EmS F-H, S-Q	ADR transport category: 3 ADR tunnel: (E)	
Hazard labels 		Marking UN 1471 LITHIUM HYPOCHLORITE, DRY / LITHIUM HYPOCHLORITE MIXTURE				
Packaging	Can be packed in approved packaging according to packing instruction P002. Can also be packaged in large packagings (LP02).					
Mixed packaging	The substance may be packaged with other substances in the same outer packaging if: - it is permitted to load the substances together, and - the substances do not react dangerously with one another.					
Remarks	If the chemical or physical properties of a substance covered by this description are such that, when tested, it does not meet the established defining criteria for the class or division listed in column 3, or any other class or division, it is not subject to the provisions of the IMDG Code except in the case of a marine pollutant where 2.10.3 applies (SP 223).					
Properties and observations	White powder with pungent odour. Soluble in water. Critical ambient temperature of decomposition may be as low as 60 °C. May cause fire in contact with organic material or ammonium compounds. Reacts with acids, evolving chlorine, an irritating, corrosive and toxic gas. In the presence of moisture, corrosive to most metals. Dust irritates mucous membranes.					
Tank type:	T1	Transport in bulk		Orange panel		
Tank provisions:	TP33	Not allowed		1471		
Stowage and segregation						
Stowage	Must be protected from sources of heat (SW1). Ventilation may be required. The possible need to open hatches in case of fire to provide maximum ventilation and to apply water in an emergency, and the consequent risk to the stability of the ship through fl					
Segregation	Check the segregation table for sea transport. The substance belongs to group: hypochlorites (SGG8). Stow "separated from" SGG1 – acids (SG35). Stow "separated from" SGG2 – ammonium compounds (SG38). Stow "separated from" SGG6 – cyanides (SG49). Stow "separated from" liquid organic substances (SG53). "Seperated from": May not be loaded into the same transport unit.					
Placarding of the transport unit	Containers, semi-trailers and tank containers must be marked with enlarged hazard labels (placards) on all four sides. Railway wagons must at least be marked with placards on both sides. All other transport units, e.g. trucks etc., must at least be placarded on both sides and at the back. The placards must have a size of at least 250 x 250 mm, and be of such quality that the labeling is still visible after 3 months at sea.					
Foodstuff	The substance is not required to be kept separate from food and feed.					
Limited quantities (LQ) <i>Combination packaging</i> Inner: 5 kg Outer: 30 kg <i>Trays</i> Inner: 5 kg Outer: 20 kg		Excepted quantities (EQ) <i>Combination packaging</i> Inner: 30 mg Outer: 1000 mg Must be packed in an intermediate packaging with cushioning material. Max 1000 parcels per vehicle/container.
