| <b>Properties and observations</b>                                                                                                                                                          |                            | May support combustion and burn without oxygen. When involved in a fire, evolves toxic fumes. Forms extremely sensitive explosive compounds with lead, silver or other heavy metals and their compounds. Toxic if swallowed, by skin contact or by inhalation.                                                                                                                                                                                   |                                |                                                                                                                                                                                                                                                                                                                                                  |                                                              |  |
