

IMDG - UN card

UN 2557

UN number 2557		Shipping name NITROCELLULOSE NITROCELLULOSE, BLANDING, MED/UDEN BLØDGØRINGSMIDDEL, MED/UDEN PIGMENT				
Class 4.1	Packing group II	Hazard labels 4.1	Marine pollutant Maybe	EmS F-B, S-J	ADR transport category: 2 ADR tunnel: (B)	
Hazard labels 		Marking UN 2557 NITROCELLULOSE				
Packaging Can be packed in approved packaging according to packing instruction P406. Note: Packagings shall be hermetically sealed (PP31).						
Mixed packaging The substance may be packaged with other substances in the same outer packaging if: - it is permitted to load the substances together, and - the substances do not react dangerously with one another.						
Remarks The formulation shall be prepared so that it remains homogeneous and does not separate during transport. Formulations with low nitrocellulose contents and not showing dangerous properties when tested for their liability to detonate, deflagrate or explode when heated under defined confinement by tests of test series 1(a), 2(b) and 2(c) respectively in the Manual of Tests and Criteria, part I and not being a flammable solid when tested in accordance with test N.1 in the Manual of Tests and Criteria, part III, subsection 33.2.4 (chips, if necessary, crushed and sieved to a particle size of less than 1.25 mm) are not subject to the provisions of the IMDG Code (SP 241). The nitrocellulose shall meet the criteria of the Bergmann-Junk test or methyl violet paper test in the Manual of Tests and Criteria Appendix 10 (SP 394).						
Properties and observations Nitrocellulose may be in granular form or in flakes. This product may also contain added pigments. When involved in a fire, evolves toxic fumes; in closed compartments, these fumes may form an explosive mixture with air. Burns extremely rapidly with intense heat radiation. The formulation should be prepared so that it remains homogeneous and does not separate during transport. May form extremely sensitive compounds with heavy metals or their salts.						
Tank type: Not allowed		Transport in bulk			Orange panel	
Tank provisions: –		Not allowed			2557	
Stowage and segregation						
Stowage		There are no special requirements for stowage.				
Segregation		Check the segregation table for sea transport. Stow “away from” class 3 (SG7). Stow “away from” SGG7 – heavy metals and their salts (SG30). “Away from”: May not be loaded into the same transport unit without the permission of the authorities.				
Placarding of the transport unit		Containers, semi-trailers and tank containers must be marked with enlarged hazard labels (placards) on all four sides. Railway wagons must at least be marked with placards on both sides. All other transport units, e.g. trucks etc., must at least be placarded on both sides and at the back. The placards must have a size of at least 250 x 250 mm, and be of such quality that the labeling is still visible after 3 months at sea.				
Foodstuff		The substance is not required to be kept separate from food and feed.				
Limited quantities (LQ) <i>Combination packaging</i> Inner: Not allowed Outer: <i>Trays</i> Inner: Not allowed Outer:				Excepted quantities (EQ) <i>Combination packaging</i> Inner: Not allowed Outer:
