| <b>Properties and observations</b>                                                                                                                 |                           | Colourless fuming flammable liquid. Flashpoint: 59 °C c.c. The flashpoint will be lower when free ether is present. Reacts vigorously with oxidizing substances. Decomposes in contact with water, evolving toxic, corrosive and flammable vapours. Causes burns to skin, eyes and mucous membranes. Inhalation of small quantities of vapour can cause breathing difficulties.                                                            |                                                                                                 |                                 |                                                              |  |
