

IMDG - UN card

UN 2627

UN number 2627		Shipping name NITRITES, INORGANIC, N.O.S. NITRITER, UORGANISKE, N.O.S.				
Class 5.1	Packing group II	Hazard labels 5.1	Marine pollutant Maybe	EmS F-A, S-Q	ADR transport category: 2 ADR tunnel: (E)	
Hazard labels 		Marking UN 2627 NITRITES, INORGANIC, N.O.S. (Note: The proper shipping name must be supplemented with the substance's technical description in brackets)				
Packaging		Can be packed in approved packaging according to packing instruction P002.				
Mixed packaging		The substance may be packaged with other substances in the same outer packaging if: - it is permitted to load the substances together, and - the substances do not react dangerously with one another.				
Remarks		The transport of the following substances is prohibited: AMMONIUM HYPOCHLORITE; AMMONIUM NITRATE liable to self-heating sufficient to initiate decomposition; AMMONIUM NITRITES and mixtures of an inorganic nitrite with an ammonium salt; CHLORIC ACID, AQUEOUS SOLUTION with more than 10% chloric acid; ETHYL NITRITE pure; HYDROCYANIC ACID, AQUEOUS SOLUTION (HYDROGEN CYANIDE, AQUEOUS SOLUTION) with more than 20% hydrogen cyanide; HYDROGEN CHLORIDE, REFRIGERATED LIQUID; HYDROGEN CYANIDE SOLUTION, IN ALCOHOL with more than 45% hydrogen cyanide; MERCURY OXYCYANIDE pure; METHYL NITRITE; PERCHLORIC ACID with more than 72% acid, by mass; SILVER PICRATE, dry or wetted with less than 30% water by mass; ZINC AMMONIUM NITRITE. See also special provisions 349, 350, 351, 352 and 353 (SP 900).				
Properties and observations		Solids. Solid mixtures with combustible material are readily ignited and may burn fiercely. Solid mixtures with ammonium compounds or cyanides may explode. If heated, may decompose, giving off toxic nitrous fumes. Harmful if swallowed. Transport of AMMONIUM NITRITES and mixtures of an inorganic nitrite with an ammonium salt is prohibited.				
Tank type:	T3	Transport in bulk		Orange panel		
Tank provisions:	TP33	Not allowed		2627		
Stowage and segregation						
Stowage		There are no special requirements for stowage.				
Segregation		Check the segregation table for sea transport. The substance belongs to group: nitrites and their mixtures (SGG12). Stow "separated from" SGG2 – ammonium compounds (SG38). Stow "separated from" SGG6 – cyanides (SG49). Stow "separated from" sulphur (SG62). Note that for this substance, the consignor must assign the substance to a segregation group based on the substance's physical and chemical properties, if applicable. "Seperated from": May not be loaded into the same transport unit.				
Placarding of the transport unit		Containers, semi-trailers and tank containers must be marked with enlarged hazard labels (placards) on all four sides. Railway wagons must at least be marked with placards on both sides. All other transport units, e.g. trucks etc., must at least be placarded on both sides and at the back. The placards must have a size of at least 250 x 250 mm, and be of such quality that the labeling is still visible after 3 months at sea.				
Foodstuff		The substance is not required to be kept separate from food and feed.				
Limited quantities (LQ)		Parcel label:		Excepted quantities (EQ)		
Combination packaging				Combination packaging		
Inner: 1 kg				Inner: 30 mg		
Outer: 30 kg				Outer: 500 mg		
Trays				Must be packed in an intermediate packaging with cushioning material. Max 1000 parcels per vehicle/container.		
Inner: 1 kg						
Outer: 20 kg
