

IMDG - UN card

UN 3214

UN number 3214	Shipping name PERMANGANATES, INORGANIC, AQUEOUS SOLUTION, N.O.S. PERMANGANATER, UORGANISKE, VANDIG OPLØSNING, N.O.S.					
Class 5.1	Packing group II	Hazard labels 5.1	Marine pollutant Maybe	EmS F-H, S-Q	ADR transport category: 2 ADR tunnel: (E)	
Hazard labels 		Marking UN 3214 PERMANGANATES, INORGANIC, AQUEOUS SOLUTION, N.O.S. (Note: The proper shipping name must be supplemented with the substance's technical description in brackets)				
Packaging	Can be packed in approved packaging according to packing instruction P504.					
Mixed packaging	The substance may be packaged with other substances in the same outer packaging if: - it is permitted to load the substances together, and - the substances do not react dangerously with one another.					
Remarks	Ammonium permanganate and its aqueous solutions and mixtures of a permanganate with an ammonium salt are not to be accepted for transport (SP 353).					
Properties and observations	When involved in a fire, may cause an explosion. Leakage and subsequent evaporation of the water of the solutions may present increased dangers as follows: .1 in contact with combustible material (particularly with fibrous material such as jute, cotton or sisal) or sulphur, danger of spontaneous combustion; .2 in contact with ammonium compounds, powdered metals or oils, danger of explosion. Transport of ammonium permanganate, aqueous solution is prohibited.					
Tank type:	T4	Transport in bulk			Orange panel	
Tank provisions:	TP1	Not allowed			3214	
Stowage and segregation						
Stowage	There are no special requirements for stowage.					
Segregation	Check the segregation table for sea transport. The substance belongs to group: permanganates (SGG14). Stow "separated from" SGG2 – ammonium compounds (SG38). Stow "separated from" SGG6 – cyanides (SG49). Stow "separated from" SGG16 – peroxides (SG60). Stow "separated from" sulphur (SG62). Note that for this substance, the consignor must assign the substance to a segregation group based on the substance's physical and chemical properties, if applicable. "Seperated from": May not be loaded into the same transport unit.					
Placarding of the transport unit	Containers, semi-trailers and tank containers must be marked with enlarged hazard labels (placards) on all four sides. Railway wagons must at least be marked with placards on both sides. All other transport units, e.g. trucks etc., must at least be placarded on both sides and at the back. The placards must have a size of at least 250 x 250 mm, and be of such quality that the labeling is still visible after 3 months at sea.					
Foodstuff	The substance is not required to be kept separate from food and feed.					
Limited quantities (LQ) <i>Combination packaging</i> Inner: 1 L Outer: 30 kg <i>Trays</i> Inner: 1 L Outer: 20 kg		Parcel label: 		Excepted quantities (EQ) <i>Combination packaging</i> Inner: 30 mL Outer: 500 mL Must be packed in an intermediate packaging with cushioning material. Max 1000 parcels per vehicle/container.
