

IMDG - UN card

UN 3219

UN number 3219		Shipping name NITRITES, INORGANIC, AQUEOUS SOLUTION, N.O.S. NITRITER, UORGANISKE, VANDIG OPLØSNING, N.O.S.				
Class 5.1	Packing group III	Hazard labels 5.1	Marine pollutant Maybe	EmS F-A, S-Q	ADR transport category: 3 ADR tunnel: (E)	
Hazard labels 		Marking UN 3219 NITRITES, INORGANIC, AQUEOUS SOLUTION, N.O.S. (Note: The proper shipping name must be supplemented with the substance's technical description in brackets)				
Packaging		Can be packed in approved packaging according to packing instruction P504.				
Mixed packaging		The substance may be packaged with other substances in the same outer packaging if: - it is permitted to load the substances together, and - the substances do not react dangerously with one another.				
Remarks		If the chemical or physical properties of a substance covered by this description are such that, when tested, it does not meet the established defining criteria for the class or division listed in column 3, or any other class or division, it is not subject to the provisions of the IMDG Code except in the case of a marine pollutant where 2.10.3 applies (SP 223). The transport of the following substances is prohibited: AMMONIUM HYPOCHLORITE; AMMONIUM NITRATE liable to self-heating sufficient to initiate decomposition; AMMONIUM NITRITES and mixtures of an inorganic nitrite with an ammonium salt; CHLORIC ACID, AQUEOUS SOLUTION with more than 10% chloric acid; ETHYL NITRITE pure; HYDROCYANIC ACID, AQUEOUS SOLUTION (HYDROGEN CYANIDE, AQUEOUS SOLUTION) with more than 20% hydrogen cyanide; HYDROGEN CHLORIDE, REFRIGERATED LIQUID; HYDROGEN CYANIDE SOLUTION, IN ALCOHOL with more than 45% hydrogen cyanide; MERCURY OXYCYANIDE pure; METHYL NITRITE; PERCHLORIC ACID with more than 72% acid, by mass; SILVER PICRATE, dry or wetted with less than 30% water by mass; ZINC AMMONIUM NITRITE. See also special provisions 349, 350, 351, 352 and 353 (SP 900).				
Properties and observations		When involved in a fire, may cause an explosion. Leakage and subsequent evaporation of the water of the solutions may present increased dangers as follows: .1 in contact with combustible material (particularly with fibrous material such as jute, cotton or sisal) or sulphur, danger of spontaneous combustion; .2 in contact with ammonium compounds, powdered metals or oils, danger of explosion. Transport of ammonium nitrites, aqueous solution is prohibited.				
Tank type:	T4	Transport in bulk		Orange panel		
Tank provisions:	TP1	Not allowed		3219		
Stowage and segregation						
Stowage		There are no special requirements for stowage.				
Segregation		Check the segregation table for sea transport. The substance belongs to group: nitrites and their mixtures (SGG12). Stow "separated from" SGG2 – ammonium compounds (SG38). Stow "separated from" SGG6 – cyanides (SG49). Stow "separated from" sulphur (SG62). Note that for this substance, the consignor must assign the substance to a segregation group based on the substance's physical and chemical properties, if applicable. "Seperated from": May not be loaded into the same transport unit.				
Placarding of the transport unit		Containers, semi-trailers and tank containers must be marked with enlarged hazard labels (placards) on all four sides. Railway wagons must at least be marked with placards on both sides. All other transport units, e.g. trucks etc., must at least be placarded on both sides and at the back. The placards must have a size of at least 250 x 250 mm, and be of such quality that the labeling is still visible after 3 months at sea.				
Foodstuff		The substance is not required to be kept separate from food and feed.				
Limited quantities (LQ) <i>Combination packaging</i> Inner: 5 L Outer: 30 kg <i>Trays</i> Inner: 5 L Outer: 20 kg		Parcel label: 		Excepted quantities (EQ) <i>Combination packaging</i> Inner: 30 mL Outer: 1000 mL Must be packed in an intermediate packaging with cushioning material. Max 1000 parcels per vehicle/container.
