

IMDG - UN card

UN 3242

UN number 3242		Shipping name AZODICARBONAMIDE AZODICARBONAMID				
Class 4.1	Packing group II	Hazard labels 4.1	Marine pollutant Maybe	EmS F-J, S-G	<i>ADR transport category: 2 ADR tunnel: (D)</i>	
Hazard labels 		Marking UN 3242 AZODICARBONAMIDE				
Packaging Can be packed in approved packaging according to packing instruction P409.						
Mixed packaging The substance may be packaged with other substances in the same outer packaging if: - it is permitted to load the substances together, and - the substances do not react dangerously with one another.						
Remarks This entry only applies to the technically pure substance or to formulations derived from it, having an SADT higher than 75°C, and, therefore, does not apply to formulations which are self-reactive substances (for self-reactive substances, see 2.4.2.3.2.3). Homogeneous mixtures containing not more than 35% by mass of azodicarbonamide and at least 65% of inert substance are not subject to this Code unless criteria of other classes are met (SP 215).						
Properties and observations Yellow or orange powder. Insoluble in water. Heat may cause exothermic decomposition, producing carbon monoxide (a toxic and flammable gas) and nitrogen. May explode if involved in a fire under confined conditions. Addition of activators (e.g. zinc compounds) may result in a decrease of thermal stability and/or a change in explosive properties.						
Tank type: T3		Transport in bulk			Orange panel	
Tank provisions: TP33		Not allowed			3242	
Stowage and segregation						
Stowage There are no special requirements for stowage.						
Segregation Check the segregation table for sea transport. Stow "separated from" class 5.1 (SG17). Stow "separated from" SGG1 – acids (SG35). Stow "separated from" SGG18 – alkalis (SG36). "Seperated from": May not be loaded into the same transport unit.						
Placarding of the transport unit Containers, semi-trailers and tank containers must be marked with enlarged hazard labels (placards) on all four sides. Railway wagons must at least be marked with placards on both sides. All other transport units, e.g. trucks etc., must at least be placarded on both sides and at the back. The placards must have a size of at least 250 x 250 mm, and be of such quality that the labeling is still visible after 3 months at sea.						
Foodstuff The substance is not required to be kept separate from food and feed.						
Limited quantities (LQ) <i>Combination packaging</i> Inner: 500 g Outer: 30 kg <i>Trays</i> Inner: 500 g Outer: 20 kg		Parcel label: 		Excepted quantities (EQ) <i>Combination packaging</i> Inner: Not allowed Outer:
