

IMDG - UN card

UN 3379

UN number 3379		Shipping name DESENSITIZED EXPLOSIVE, LIQUID, N.O.S. DESENSIBILISERET EKSPLOSIVSTOF, FLYDENDE, N.O.S.				
Class 3	Packing group I	Hazard labels 3	Marine pollutant Maybe	EmS F-E, S-Y	<i>ADR transport category: 1 ADR tunnel: (B)</i>	
Hazard labels 		Marking UN 3379 DESENSITIZED EXPLOSIVE, LIQUID, N.O.S. (Note: The proper shipping name must be supplemented with the substance's technical description in brackets)				
Packaging	Can be packed in approved packaging according to packing instruction P099.					
Mixed packaging	The substance may be packaged with other substances in the same outer packaging if: - it is permitted to load the substances together, and - the substances do not react dangerously with one another.					
Remarks	Substances shall not be transported under this entry unless approved by the competent authority on the basis of the results of appropriate tests according to part I of the Manual of Tests and Criteria. Packaging shall ensure that the percentage of diluent does not fall below that stated in the competent authority approval at any time during transport. 1. These substances are liable to exothermic decomposition at elevated temperatures. Decomposition can be initiated by heat or by impurities (e.g. powdered metals (iron, manganese, cobalt, magnesium) and their compounds). 2. During the course of transport, these substances shall be shaded from direct sunlight and all sources of heat and be placed in adequately ventilated areas (SP 311).					
Properties and observations	Desensitized explosive. Explosive and sensitive to friction in the dry state. May form extremely sensitive compounds with heavy metals and their salts.					
Tank type:	Not allowed	Transport in bulk		Orange panel		
Tank provisions:	–	Not allowed		3379		
Stowage and segregation						
Stowage	There are no special requirements for stowage.					
Segregation	Check the segregation table for sea transport. Stow "away from" SGG7 – heavy metals and their salts (SG30). Note that for this substance, the consignor must assign the substance to a segregation group based on the substance's physical and chemical properties, if applicable. "Away from": May not be loaded into the same transport unit without the permission of the authorities.					
Placarding of the transport unit	Containers, semi-trailers and tank containers must be marked with enlarged hazard labels (placards) on all four sides. Railway wagons must at least be marked with placards on both sides. All other transport units, e.g. trucks etc., must at least be placarded on both sides and at the back. The placards must have a size of at least 250 x 250 mm, and be of such quality that the labeling is still visible after 3 months at sea.					
Foodstuff	The substance is not required to be kept separate from food and feed.					
Limited quantities (LQ)			Excepted quantities (EQ)
